(a) Core and end-to-end acceptance
Six-check core (calibration)
End-to-end operational (evaluation)
Acceptance probability
Physical error rate, p
(b) Pre-downstream rejection composition
Frontend ED
Six CAT$_7$ verifications
Midpoint ED
Record veto
Fraction of calibration attempts
Physical error rate, p
(c) Fault locations in accepted runs
Total fault count
0
1
2
3
4
5+
Fraction of operationally accepted runs
Physical error rate, p
(d) Accepted-output boundary classification
Truth-closed at stipulated continuation
Accepted detectable residual
Fraction of operationally accepted outputs
Physical error rate, p
